3. Did you know Dialysis Facility Compare provides Star Ratings for every Medicare-certified #dialysis center? Medicare Star Ratings combine nine clinical quality measures and allow #EndStageRenalDisease patients to easily compare #dialysis centers and choose the best one for them. How does your dialysis center compare? <http://go.cms.gov/DFC>

# Sample Drop-In Newsletter Article

Do you want to know how patients rate the quality of care at your dialysis center? Check out Dialysis Facility Compare.

Dialysis Facility Compare allows patients and their caregivers to search for dialysis centers, compare them side by side, and find the right one for them. Patients who are currently receiving dialysis, can use the site to understand how Medicare measures the quality of care dialysis centers provide.

The information on Dialysis Facility Compare includes:

- Dialysis center contact information and services offered
- Clinical quality of care Star Ratings
- Clinical quality measure data
- Patient experience of care survey results

The Centers for Medicare and Medicaid Services (CMS) has calculated Star Ratings for every Medicare-certified dialysis center, with five stars as the highest rating. The Star Ratings combine nine clinical quality measures of how well dialysis centers care for their patients and how often each center uses best practices to care for its patients and keep them healthy.

As of October 19, Dialysis Facility Compare also contains the results of patient experience of care survey which includes information about how well staff listen and how clean the facility is.

Visit <http://go.cms.gov/DFC> to see how patients rate the quality of care your dialysis center provides.
